

B Charan Kumar Reddy

Linkedin: [linkedin.com/in/charan8289/](https://www.linkedin.com/in/charan8289/)
GitHub: <https://github.com/CHARAN8289>

Email: charankumarreddy8289@gmail.com
Mobile: +8340834243

SKILLS

Programming Languages:	C, Java, Python, HTML and JavaScript.
Libraries:	Pandas, NumPy, and Matplotlib
Tools/Platforms:	Git, GitHub, Microsoft Office, Tableau, and Power-Bi.
Data management:	MySQL, and Oracle.
Soft Skills:	Problem- Solving Skills, Adaptive and quick learner, Leadership and Team handling.

PROJECTS

Bio Verify GitHub	April 2026 – May-2026
- Built an AI-based fake social media account detection system using supervised machine learning. - Developed a complete ML pipeline with preprocessing, feature engineering, and model training. - Trained a Gradient Boosting classifier on a 3,000-record dataset for real vs fake profile prediction. - Engineered behavioural features like follower ratio, spam rate, and account activity patterns. Tech Stack: Python, Scikit-learn, Pandas, NumPy, Machine Learning Algorithms.	
Dynamic Memory Management Visualizer GitHub	Oct 2024 – Dec 2024
- Built an interactive Dynamic Memory Management Visualizer to simulate paging, segmentation, and virtual memory techniques. - Implemented FIFO and LRU page replacement algorithms using Python and Flask. - Developed a responsive frontend with real-time memory block visualization using HTML, CSS, and JavaScript. - Integrated analytics for page faults, hit/miss ratio, and memory utilization tracking. Tech Stack: Python, Streamlit, Pandas, NumPy, NLP, Machine Learning, Database Management, Data Visualization, Generative AI, GitHub.	
Dropout Risk Pattern Discovery from Academic Trajectories GitHub	Nov 23 – Dec23
- Developed an unsupervised machine learning framework to identify student dropout risk patterns from academic trajectory data. - Implemented K-Means, DBSCAN, Agglomerative, and GMM clustering algorithms for behavioural pattern discovery. - Applied PCA, t-SNE, and UMAP for dimensionality reduction and interactive data visualization. - Built SHAP-based explainable AI modules with risk scoring and demographic bias analysis. Tech Stack: Python, Scikit-learn, Pandas, NumPy, Unsupervised Machine Learning, Clustering Algorithms, Explainable AI (XAI), Streamlit, Matplotlib.	

CERTIFICATIONS

The Bits and Bytes of Computer Networking – Google Certificate	Sep'2024
Fundamentals of Network Communication – Coursera Certificate	Sep'2024
Computational Theory - Infosys Certificate	Jan'2025
Build Generative AI Apps and Solutions with No-Code Tools – Infosys Certificate	Jan'2025
ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM – Infosys Certificate	Aug'2025

SUMMER TRAINING

Data Structures Algorithms – Cipher Schools Certificate	Jun' 2025
- Applied advanced data structure and algorithmic concepts to develop optimized solutions in C and Python. - Implemented key structures including linked lists, stacks, queues, trees, heaps, and graphs. - Analysed time and space complexity to improve computational efficiency. - Solved real-world coding challenges emphasizing performance and scalability.	

EDUCATION

Lovely Professional University <i>Bachelor of Technology - Computer Science and Engineering</i>	Punjab, India Since Aug' 2023
Valley Oak Junior college <i>Intermediate Percentage: 86%</i>	Telangana, India April 2021 - March 2023
RGM International School <i>Matriculation Percentage: 85%</i>	Andhra Pradesh, India April 2020 - March 2021
